

TC/TCM Two-stage Liquid Ring Vacuum Pumps

The TC/TCM liquid ring vacuum pumps were created for the chemical, petrochemical and power industries.

These pumps with their integral two stage rotors are able to condense vapors that come off the process and to recover or dispose of them.

The result is a highly reliable and efficient vacuum pump.

Features	Benefits
Integral two-stage impeller	High reliability, can attain high vacuum without additional components
V-belt or flexible coupling drive	Numerous installation options
Offered in ductile iron or in stainless steel	High durability and corrosion resistance
Shrouded rotor blades	For strength and reliability
Single or double mechanical seal available	Ability to select the proper sealing option

TC/TCM 1-5

Introducing New from Gardner Denver Nash The NASH TC 8, 9, & 10 Two-stage Liquid Ring Vacuum Pumps

The NASH TC 8, 9, & 10 bring a new level of design features and benefits to two-stage liquid ring vacuum pumps, especially for the Chemical Process Industry.

Features	Benefits
New, patented air/water separation design	Improved efficiency
"O" ring and gasket sealing options	Optimum sealing to your specs
ATEX compliant	Meets today's industry standards
Accepts single, double and cartridge mechanical seals	Flexibility to meet your process requirements
Removable bearing bracket	Easier maintenance
ISO & ANSI connections available	Meets global requirements
All standard NASH TC features	Your best guarantee for quality and reliability
